Advanced project management training

**A programme to build on existing
project management skills**

Objectives:

At the end of the workshop participants will be able to;

- recognise the importance of team dynamics in a project management context
- understand and use the 'power of people in reaching project success
- Give you the chance to examine new skills and ideas in a safe environment

This course is for anyone who is:

- currently a project sponsor or who will soon be a project sponsor
- a senior manager who wants to understand what project management means for themselves and their organisation
- a project manager who need to fully understand the role of a project sponsor

Outline course content:

- project leadership- what it means and why it is so important to delivery of projects
- introducing project motivation to deliver effectively
- project success or project failure – it's your choice!
- benefits management – ensuring these are clear, managed and delivered
- project governance – ensuring it works and works well
- the project board or steering group – its role in project success and delivery
- the project sponsor – their role in the overall success of projects
- understanding change and its implications for project success
- the team and their contribution – managing the team and developing the team
- developing a delivery culture

The workshop will be a mix of tutor input, group and individual discussions alongside case study work to reinforce main messages
